

## WEBINAR SERIES OVERVIEW

The Kingdom of Saudi Arabia's next Voluntary National Review will be in July 2023. The Kingdom of Saudi Arabia has made unprecedented transformations over the past seven years. By having a robust picture of the Kingdom of Saudi Arabia's sustainable development progress, the country will be able to better document its remarkable progress since its last Voluntary National Review, as well as its strategy for the proceeding seven years as it approaches 2030. The Kingdom of Saudi Arabia has the potential to have one of the best Voluntary National Reviews in 2023. However, it is essential that the Kingdom of Saudi Arabia has the most accurate and up-to-date data reflected in its Voluntary National Review to achieve this goal. This, in turn, could better position the Kingdom of Saudi Arabia as a thought leader in sustainable development in the region and the rest of the world.

However, many of these changes are yet to be reflected in global data repositories. This webinar aims to equip and facilitate the interconnectedness between the Kingdom of Saudi Arabia and relevant data custodians. Improving data availability and accurate reporting in global data repositories for the Kingdom of Saudi Arabia will better showcase the exemplary progress the Kingdom has made in recent years. This webinar will exclusively focus on data in the United Nations Statistics Division Sustainable Development Goal (SDG) repository and data used by the Sustainable Development Solutions Network's 2022 Sustainable Development Report. The webinar will also help prepare the Kingdom of Saudi Arabia for the 2023 Sustainable Development Report by updating and having relevant data prepared for the Sustainable Development Solutions Network public data forum in the Spring of 2023.

The webinar will focus on three areas affecting data availability: **(1) Unreported Data** (Data that is not yet publicly available); **(2) Outdated Data** (Data that is not being updated frequently); **(3) Inconsistent Values with International Reports** (3.1 Data that is being reported in national repositories but is not being reported in global data repositories and 3.2 Data that is inaccurately reported in global repositories).

## PACKET OVERVIEW

Accompanying this overview is an individualized packet for your organization. The individualized packet is a Microsoft Excel Workbook with two Worksheets, one for Sustainable Development Goal Indicators and the other for Sustainable Development Report Indicators. Within each Worksheet, all the indicators from the global repository are listed, their latest value and year if reported, an objective prioritization/rank of each Indicator, if the Indicator is considered challenging, a description, the Government custodian if available, and the international custodian.

## HIGH-LEVEL MEETING AGENDA:

16:00 - 16:10 Opening Remarks

**H.E.M. Faisal bin Fadel Al-Ibrahim**  
Minister of Economy and Planning, Head of Sustainable Development Steering Committee  
**Ms. Nathalie Fustier**  
UN Resident Coordinator

16:10 - 16:20 Overview of the objectives of the National SDG Data Webinar

**Ms. Yara Sindi**  
Head of Monitoring and Reporting

16:25 - 16:40 Overview and example from the KSA of how the mechanism works to populate UNSTAT's global SDG repository

**Ms. Yongyi Min**  
Chief of Sustainable Development Goals Monitoring Section, Statistics Division,  
Department of Economic and Social Affairs

16:40 - 16:55 Overview of the SDR and the public data forum in the Spring
